SKILLS

FRONTEND: **JavaScript, React, Redux, React Native, CSS3/SASS, HTML5, Git**
BACKEND: **Ruby, Ruby on Rails, Node, Express, PostgreSQL, MongoDB, SQL, AWS, Heroku**

PROJECTS

Woof (**JavaScript, React, Redux, Rails, PostgreSQL, AWS S3, Git, Heroku, CSS, HTML**)   Live Site | Github

Woof is a mobile-responsive website inspired by Yelp for finding the dog breed that is right for you.

- Improved UX/UI by leveraging media queries, flexbox and mobile-first design (CSS/SASS) to create a beautiful, responsive site on every screen /device (mobile, tablet, desktop).
- Enhanced site accessibility by implementing a React search bar component, which queries the database (PostgreSQL), updates the Redux state, and shows a drop down menu of results based on user input.

Portkey (**JavaScript, React Native, Redux, Expo, Git**)   Showcase | Github

Portkey is a mobile app that compares prices between Uber & Lyft to help save you money on your next ride.

- Architected RESTful API integrations with Lyft, Uber, Google Maps & Google Places to show users current location, render nearby rides, and show estimated prices based on route.
- Improved UX by enabling mobile deep linking from the Portkey app to the Uber & Lyft apps, passing JSON data containing ride information so the apps open with your specified route and ride type.

Kraving (**JavaScript, React, Redux, Node, Express, MongoDB, Git, Heroku, CSS, HTML**)   Live Site | Github

Kraving is a mobile-responsive website that aggregates Yelp & Zomato reviews to help find your next meal.

- Utilized JavaScript ES6 fetch and async / await for external API calls with Google, Yelp & Zomato to improve code cleanliness, readability and maintainability.
- Worked collaboratively with a team of four, leveraging agile methodology, Git, and version control to keep a clean master branch and allow for simultaneous feature development.

EXPERIENCE

Branch (*Account Executive, Growth Team Lead, Integrations Engineer*)   Feb 2017 - July 2018

- Designed and led technical training, resulting in six new hires hitting their sales quota and starting a full-cycle SMB team.
- Promoted twice, averaging 120% to goal due to excellent communication and team-leadership.

TubeMogul (*Account Executive, Sales Development Representative*)   Sep 2014 - Apr 2016

- Promoted within 10 months due to coachibility and ability to work independently, setting over 75 qualified enterprise meetings as an SDR. Personally closed $250k in revenue as an Account Executive.

EDUCATION

App Academy - 1000 hour intensive web development bootcamp.   Aug 2018 - Nov 2018
Stanford - CS106A Object-oriented design in Java.   June 2016 - Aug 2016
Colorado College - Bachelor of Arts, International Political Economy.   Aug 2010 - May 2014

PERSONAL

Avid reader. Favorite authors include Walter Isaacson & Tom Wolfe. Currently reading Blood Meridian.
